

Doppelmayr Group

The Doppelmayr Group represents quality, technology and market leadership in the construction of ropeways for passenger and material transport as well as hightech intralogistics solutions.

This gives the company a high degree of know-how and problem-solving expertise for manifold transport requirements. The Group has created different areas of expertise that provide the customers with a no-worries package.

The company looks back on 130 years of corporate history and a century of experience in the planning, development, design, production, and construction of ropeways. This proven technology and the reliability achieved with it have made ropeways a popular and high-performance means of transport, in skiing and recreation re-

gions and, to an increasing extent, also in cities. Modern carriers such as cabins and chairs offer comfort for passengers and delight over and over with new features in terms of design and safety.

The Customer Support that is interlinked on a global level provide advice and assistance on short notice. For the professional operation and maintenance of ropeway installations, the team includes experts who assist the customers in the training and formation of their own teams for these areas. In matters of material and freight transport, Doppelmayr can provide an efficient material flow with high-performance systems for bulk material and unit loads as well as fully automatic intralogistics solutions. This brings unlimited possibilities for a custom-tailored product.
