GREENSPACES: an integrated, georeferenced software for the efficient organisation and

documentation of urban green maintenance and care activities. Its intuitive and easy-to-use interface, adapted to customer needs, makes GreenSpaces the ideal solution for everyone involved in green management. Thanks to web and mobile technology, GreenSpaces users can access a constantly updated database from any device. WORKSPACES: WorkSpaces is an integrated and geo-referenced software platform: the perfect solution for organising and managing the maintenance of public and private assets efficiently and transparently. Thanks to a simple interface specifically designed for Web and Mobile technology, all users can access a constantly updated central database and edit information within their areas of responsibility. Availability of up-to-date information on assets and historical records of job completed allows for more effective planning of future activities and control of sites.

### Description:

R3GIS is a pioneering company dedicated to revolutionizing green space management through innovative technology and data-driven solutions. We are committed to enhancing urban resilience, improving quality of life, and fostering environmental sustainability. Our mission integrates scientific knowledge with practical applications, engaging diverse stakeholders to create smarter, more efficient, and environmentally conscious urban ecosystems. At R3GIS, we value systemic thinking, openness, and collaboration, striving to develop solutions that address current needs while adapting to future challenges posed by climate change and urbanization.
