**Description:**

Troyer provides complete water-to-wire solutions including the electromechanical equipment for hydropower plants up to 30 MW of power (Pelton, Francis and Kaplan). Turbines, governors and control panels are designed and produced to a high standard in our headquarters. This electromechanical single source solution guarantees a highly integrated system and therefore maximum availability and reliability in operation. Besides the European countries in the Alps, the installations "Made by Troyer" can be found in different parts of the world, from Latin America to Northern Europe to Asia.
